

NHF'S ACCOMPLISHMENTS FROM 2008-2018

- 1. April 2008 in Beijing, China** – NHF begins its lone campaign against neurotoxic aluminum in food additives at the Codex Committee on Food Additives (CCFA) meeting, which after five more years of fighting and with the help of the European Union delegation, succeeded in achieving the removal of approved status for 75% of aluminum used in food additives.
- 2. November 2009 in Dusseldorf, Germany** – Singlehandedly initiated the opposition at the Codex Nutrition Committee that stopped the “dumbed-down” Nutrient Reference Values (NRVs) standard for vitamins and minerals from being adopted. (These NRVs would have set daily amount for Vitamin C at 45 mg, and almost all of the B vitamins would have been reduced by up to 66%, etc.)
- 3. November 2010 in Dublin, Ireland** – NHF and NHF-Ireland launched an anti-fluoridation campaign in Ireland that generated tremendous publicity and support as well as awareness of the dangers of toxic fluoride in the public-water supply.
- 4. November 2010 in Santiago, Chile** – NHF efforts at the previous year’s meeting of the Codex Nutrition Committee continue to pay off as the Committee decides to table the matter of lowered vitamin-and-mineral NRVs for another year.
- 5. March 2011 in Beijing, China** – NHF succeeded, along with the EU, in holding back any advancement of aluminum food-additives standards at CCFA.
- 6. March 2011 in The Hague, Netherlands** – The NHF continued to gather support at the Codex Contaminants Committee to oppose a huge exemption for infant formula that would allow unlimited amounts of melamine contamination of those formulas.
- 7. July 2011** – NHF helped stop an unhealthy vet-drug ractopamine standard from being adopted by the Codex Alimentarius Commission. After several years of success, however, the ractopamine standard was finally adopted by the Codex Alimentarius Commission at its 2012 meeting.
- 8. May 2011 in Quebec City, Canada** – Along with other Codex delegations, NHF worked at the Codex Committee on Food Labelling to maintain the right of any Codex member state to require labeling of GMO foods.
- 9. Fall 2011 in Washington, D.C.** – NHF introduced important legislation (H.R.3380) to do an end run around FDA's recent draft Guidance document for New Dietary Ingredients that could remove thousands of supplements from store shelves or at least greatly increase their expense to consumers.
- 10. February 2012 in London, England** – NHF-UK held a very successful health and health-freedom speaker’s event held in East-Central London.
- 11. March 2012 in the Netherlands** – After a three-year campaign where NHF at first stood totally alone, NHF, with unanimous Codex-delegate support, stopped a Codex standard from being adopted for a “sky’s the limit” exemption for melamine contamination in infant formula.

- 12. December 2012 in Bad Soden, Germany** – In an ongoing battle, with minor exceptions, NHF stopped for a third year in a row the dumbed-down vitamin-and-mineral NRVs from being adopted at Codex.
- 13. March 2013 in Beijing, China** – The NHF and EU succeed in banning at the Codex level 50% of all aluminum-containing food additives and in reducing aluminum levels by 50% in all other food additives.
- 14. April 2013 in Moscow, Russia** – Scott Tips of NHF awarded the distinction of addressing the assembled delegates of the Codex Committee on Contaminants in Food on health and health-freedom issues, reminding the delegates there that their decisions affect “real people and their lives” and that they all owe a duty to them to do what is right.
- 15. February 2014 in Bergen, Norway** – NHF argued against the continued inclusion of aluminum in fish batter at the Codex Committee on Fish and Fishery Products. Aluminum was removed.
- 16. March 2014 in the United States** – NHF was the first to notice and point out that the FDA, with its new proposed food-labeling guideline, was actually attempting to harmonize vitamin-and-mineral Daily Allowances down to ridiculously low Codex levels.
- 17. March 2014 in Hong Kong, China** – NHF continued its work in removing aluminum from food additives at the Codex Committee on Food Additives, and argued that aspartame is a dangerous and harmful artificial sweetener.
- 18. March-April 2014 in The Hague, Netherlands** – NHF argued for lower permissible arsenic and lead levels in foods at the Codex Committee on Contaminants in Foods meeting. The debate continues with NHF persistently pushing its views for safer foods.
- 19. April 2014 in Paris, France** – NHF participated at the Codex Committee on General Principles meeting where changes in the Codex Procedural Manual were proposed.
- 20. April 2014 in Atlanta, Georgia** – NHF actively participates at a doctor/healthcare-practitioner conference given by Dr. Dan Pompa and where Scott Tips spoke on Codex and health freedom to a large audience.
- 21. May 2014 in Daventry, England** – NHF-UK appeared in force at the Alternative View 5 conference, where Scott Tips again spoke on Codex and health freedom.
- 22. May-June 2014 in Texas** – NHF joined coalition efforts to help with intended passage of a constitutional amendment in Texas guaranteeing Texans their health freedoms.
- 23. July 2014 in Geneva, Switzerland** – NHF actively participated in the Codex Alimentarius Commission meeting, where it argued strenuously for decreasing the amount of lead permitted in infant formulas, the levels of arsenic in rice, and against any continued use of aluminum as a food additive.
- 24. September 2014 in The Hague, Netherlands** – NHF attended the Codex European regional meeting (styled CCEURO) where NHF was publicly acknowledged by the Chairman for its passionate representation of consumer interests.
- 25. October 2014 in Rome, Italy** – Joined by India, NHF aggressively argued at the Codex Committee on Food Labeling against the continued erosion of organic standards.

26. November 2014 in Birmingham, UK – NHF participated at a nationwide conference where Scott Tips speaks on health freedom to a packed crowd.

27. November 2014 in Bali, Indonesia – NHF actively participated at a pivotal Codex Nutrition Committee meeting on vitamin-and-mineral daily values where NHF continued its five-years of work stopping our vitamin-and-mineral nutrition from being dumbed down to absurd levels. In fact, NHF succeeded in having, for example, Vitamin C levels increased by 220%.

28. July 2015 in Geneva, Switzerland – NHF, along with other Codex delegations, successfully prevented a Codex standard for recombinant bovine growth hormone (rBGH) from passing its last hurdle and being adopted such that rBGH-doped milk and dairy products could be sold worldwide.

29. Spring 2016 in California & Florida – NHF attended and was recognized at CalJam’s annual event in Southern California, and gave a speech before the International Academy of Oral Medicine and Toxicology (IAOMT), where NHF was well received.

30. June-July 2016 in Rome, Italy – Once again, NHF successfully prevented a Codex standard for recombinant bovine growth hormone (rBGH) from passing its last hurdle and being adopted such that rBGH-doped milk and dairy products could be sold worldwide.

31. November 2016 in Los Angeles, California – NHF singlehandedly starts a rebellion at the Codex Committee on Food Hygiene meeting and stops an attempt to permit the use of non-organic chemicals to wash organic produce.

32. July 2017 in Geneva, Switzerland – Scott Tips of NHF was invited to address the many hundreds of assembled Codex delegates, which he did by urging them to ensure that scientific integrity becomes a hallmark of Codex.

33. July-Sept 2017 – NHF speaks out at numerous rallies throughout Italy (Rome, Trieste, Treviso, and Venice) against the mandatory child vaccination laws enacted in that country in early August 2017 that increased childhood vaccines from 4 to 12. The crowds in Venice, Italy alone totaled 8-10,000 activists.

34. December 2017 – At the Codex Nutrition Committee meeting held in Berlin, Germany, NHF successfully opposed a “Biofortification” definition that would have misleadingly included GMO foods in its definition.

35. February 2018 – NHF filed an Amicus Curiae brief against Monsanto’s position in California Eastern District Court litigation. In that litigation, Monsanto, through its minions, is seeking to stop the State of California from declaring glyphosate as a carcinogen. NHF has joined with the State of California in opposing the lawsuit.

36. March 2018 – At the CCCF meeting in Utrecht, Netherlands, NHF helped stop high levels of methylmercury from being approved as “safe” in Swordfish, despite a strong push by many other Codex delegates for commercial reasons to allow unsafe fish to be sold to consumers.

37. March 2018 – NHF submitted written comments in favor of a Proposed Rule by the U.S. Department of Health & Human Services entitled “Protecting Statutory Conscience Rights in Health Care; Delegations of Authority.” This new rule would protect our rights to decline any medical treatment by exercising our right of free conscience.

38. April 2018 – At the CCRVDF meeting in Chicago, Illinois, the NHF played a key role in stopping Zilpaterol (the harmful beta-agonist drug given to food animals), from being approved as safe by Codex, despite the strong efforts of many other Codex delegates and Merck to allow this harmful, unlabeled drug in animal feed.
