July 11, 2005

Henry Lamb- A Great Freedom Fighter Documents How your Dietary Supplements are Under Attack

Mr. Speaker, I urge my colleagues to read "Your dietary supplements: Under attack again" by Henry Lamb, which I am inserting into the record. Mr. Lamb explains the threat to American consumers of dietary supplements and American sovereignty by the Codex Alimentarius commission, commonly referred to simply as Codex. The United Nations created Codex to establish international standards for foods and medicines. Just last week, representatives of the United States government agreed to a final version of Codex's standards on dietary supplements which, if implemented in the United States, could drastically reduce Americans' ability to obtain the supplements of their choice. Members of the American bureaucracy may be hoping to achieve via international fiat what they cannot achieve through the domestic law-making process-- the power to restrict consumers' access to dietary supplements. American bureaucrats may gain this power if the World Trade Organization, which considers Codex "guidelines" the standard by which all other regulations are judged, decides that our failure to "harmonize" our regulations of dietary supplements to meet Codex's recommendations violates international trading standards! This could occur despite the fact that American consumers do not want to be subjected to the restrictive regulations common in other parts of the world, such as the European Union.

This article is typical of Henry Lamb's work. For almost twenty years, beginning at an age when most Americans are contemplating retirement, Mr. Lamb has worked to expose and stop threats to American liberty, sovereignty, and prosperity. Mr. Lamb became involved in the battle for liberty when, as the CEO of a Tennessee construction company, he founded a state association of contractors to work against excessive regulations. In 1988, Henry Lamb founded the Environmental Conservation Organization to defend true environmentalism, which is rooted in the truth that there is no better steward of the environment than a private property owner, from those who used the environment as a cover for their radical statist agendas. Since 1992, Mr. Lamb and ECO have focused on the threat to economic liberty and self-government posed by the radical global environmental agenda.

Henry Lamb works to further the cause of liberty by giving speeches around the country, editing an on-line magazine, making numerous television and radio appearances, and writing a weekly column to inform his fellow Americans of the latest

scheme to undermine their freedoms. Mr. Lamb is the model of a citizen-activist, and all who wish to become involved in the battle for freedom can learn from his example. In conclusion, I once again urge my colleagues to read Mr. Lamb's article to learn about the need to protect American consumers from Codex, and I thank Mr. Lamb for his tireless devotion to the cause of freedom.

YOUR DIETARY SUPPLEMENTS: UNDER ATTACK AGAIN

(from WorldNetDaily, June 11, 2005)

(By Henry Lamb)

The Codex Alimentarius Commission sounds like one of those shadowy, sinister organizations conjured up by one-world-government nuts to scare people.

Truth: It is!

The Food and Agriculture Organization and the World Health Organization created this commission in the early 1960s to set standards for food safety and to "harmonize" the laws of member nations. The commission was endorsed by U.N. Resolution 39/248, which says:

"When formulating national policies and plans with regard to food, governments should take into account the need of all consumers for food security and should support and, as far as possible, adopt standards from the..... Codex Alimentarius."

The Codex Alimentarius Commission consists of delegates from 163 member nations representing 97 percent of the world's population. It meets every two years, either in Rome or Geneva. Between meetings, the commission is governed by an executive committee that directs the activities of its many committees.

Of immediate concern is the ongoing effort to bring dietary supplements in America under the control of standards set by this commission. Dietary supplements generate a \$17 billion industry in the United States, which affects more than 150 million consumers, according to Congressional findings (H.R. 2485). Proposed procedures and standards could virtually destroy this market and deprive millions of Americans of the supplements they want to use.

The European Union Directive on Dietary Supplements, which becomes law in August, severely restricts the types and quantities of supplements that may be legally sold. Most forms of vitamins C and E, for example, are not available, or are available only in extremely small doses. If current plans proceed on course, American consumers are in for a shock.

How can this little-known international commission control what consumers buy in the United States?

An even less-known agency, deep within the bowels of the U.S. Department of Agriculture is responsible for U.S. participation in the Codex Commission and designates delegates to each of the commission's committees. Barbara O. Schneeman is the delegate to the Codex Committee on Nutrition and Food for Special Dietary Uses.

The effort to regulate dietary supplements has been under way for more than a decade. In 1994, Congress adopted the Dietary Supplement Health and Education Act, which kept supplements beyond the reach of the drug police. In the past, Codex recommendations have been non-binding. Now, however, the Codex Alimentarius Commission is teaming up with the World Trade Organization to bring international enforcement to the dietary-supplement battle.

Ironically, it was primarily the U.S. that brought the WTO into existence in 1994, as the successor to GATT, the General Agreement on Tariffs and Trade. The WTO agreement specifically requires that the member nations--including the U.S.--conform its laws to meet the requirements of WTO decisions. Failure to conform results in stiff financial penalties. The Codex Commission and the European Union want the WTO to enforce Codex standards, which fly directly in the face of the Dietary Supplement Health and Education Act.

Pascal Lamy of France was just selected as director general of the WTO. Lamy served as a member of the French Socialist Party's steering committee and was chief of staff and representative of the European Commission for President Jacques Delors. Since 1995, he has served as a member of the Central Office of the Mouvement Européen (France) and as a member of the European Commission, responsible for trade.

The Codex Commission will be meeting in Rome July 4-9 to adopt the final rules on dietary supplement use. Dr. Carolyn Dean, president of Friends of Freedom International and on the board of the National Health Federation, will attend this meeting and return to the U.S. just in time to present her report to the Sixth Annual Freedom 21 Conference in Reno, July 14-16.

The Codex Alimentarius Commission's reach is much broader than dietary supplements. Its committees are also working on standards for pesticide residue, labeling of all kinds of foods, food additives and nutrients, veterinary medicine and drugs, as well as standards and methods for analysis. The function of this organization is to establish standards for all food worldwide and to enforce those standards through the power of the World Trade Organization.

Few people know that there is such a thing as the Codex Alimentarius Commission. It was created to promote food safety in international trade. It is on the brink of becoming an Orwellian bureaucracy--far worse than the worst fantasies of the one-world conspiracy theories.

The Codex Alimentarius Commission is neither fantasy nor theory; it is real.
