National Health Federation Legislative Update

By Charles Frohman & Alex Landry

December 16, 2020

[The National Health Federation \(NHF\) presents its political report on the current health-freedom situation via video interview of NHF's Lobbyist Charles Frohman with NHF Video Host Alex Landry, so click here to view.](#)

In our November political update (YouTube video posted on December 9, 2020), NHF members and supporters can hear about the increasingly draconian COVID-19 orders and lockdown restrictions emanating from various government tyrants and get a teaser on three other matters: (1) pushback on wireless radiation; (2) jet geoengineering pollution; and (3) growing local fights over water fluoridation.

On the governments' worsening COVID-19 orders, their threat to mandate and track vaccinations is the most dangerous of threats to our health and health freedom. Most immediately, though, is the unbelievable and unnecessary attack on parental rights by the government of the District of Columbia (DC), which would not only let DC school authorities vaccinate children without parental consent but would then actually require that the vaccination be hidden from the parents!

As we are at the end of the year, as a nonprofit, NHF would be remiss if we failed to remind our supporters of the opportunity to include our health-freedom organization as a recipient of your most generous donation. Without your solidarity and support we cannot continue to nationally and internationally advocate for nutritional and medical freedom, a healthier environment, and clean, safe, and nutritious food. Please go to <https://thenhf.com/join-us/make-a-donation/> and make a donation now. No matter how small or large, it will help NHF help you.
