

Complete Press Censorship in Health

By David Noakes

The mainstream press flatly refuses to publish one of the most exciting stories of our times – that there is a cure for cancer. We emailed all of the British National Dailies to tell them about the GcMAF Awareness Day scheduled for 11:00 a.m. on September 11, 2019, outside the Houses of Parliament in London. Some 200 wonderful people turned up with their own banners and T-shirts, which said “GcMAF cures cancer” and “Free Lynda Thyer.”

Yet not one newspaper turned up. They are all ruthlessly controlled, as they are in any dictatorship. The press is no longer a watchdog: It is a lapdog to massive corporations and government. They seem to ignore the fact that GcMAF is a safe, natural human protein, and therefore a human right, which saves the lives of 75% of Stage-4 cancer patients.

To get our message out, we instead made five videos that are now on Facebook, YouTube (UKColumn), and Twitter (https://www.youtube.com/watch?v=Ke5ja_wFSg&t=214s).

We had also telephoned and emailed the three major political parties here in the United Kingdom, all of whom said that they would receive our GcMAF presentation. So, off we marched to present our GcMAF information packets, first to the Conservative Party Headquarters at 4 Mathew Parker Street, London.

The Conservatives flatly refused to receive our A4 envelope. Eventually, after chanting “GcMAF Cures Cancer” and “Free Lyn Thyer,” I pushed my way through their locked gate when someone else badged their way in, and was able to give it to a doorman. Who knows, though, what has happened to the envelope?

We then marched to the Brexit Party headquarters at 83 Victoria Street. The receptionist there dryly informed us that they had moved with no forwarding address. We rang the Party, and they said they were still there. But the receptionist flatly

refused to take our envelope.

At the Labour Party HQ at 105 Victoria Street, the most ghastly woman, a real sales-prevention officer and the last person you would ever have in a marketing position, flatly refused, as did reception, to receive our envelope. Then, twenty of us gatecrashed our way into reception to no avail. All of these political parties are more concerned with isolating themselves from the public, with locked entrances, security enforced receptions, and internal policies of avoiding all public contact.

We had also emailed some investigative journalists, Russian Television (RT.com) and Al Jazeera. No, they didn't show up either, as usual.

The BBC, see www.abolishthebbc.co.uk, and *The Daily Mail*, only support the \$1.3-trillion pharmaceutical corporations and their henchmen, the Medicines and Healthcare products Regulatory Agency, with its big pharma directors, who kill 200,000 British a year according to www.mhracorrupt.st.

But an Iranian film crew asked what the demonstration was about and filmed me while I told them. So, the only public media we could get was Iranian. How England has fallen.

We've already had 33 persecutions, including all of our bank accounts shut for nearly five years, 14 raids by over 100 officers, forced to watch 200 people recovering from stage-4 cancer then die of it when the MHRA banned GcMAF, perjury by the MHRA, then 15 court cases, four prison sentences with more to come. All to protect the multi-billion dollar super profits of the poison of chemotherapy.

We want to free Lynda Thyer, the first of four GcMAF biomedical scientists, because the MHRA had contacted their opposite numbers, OCLAESP in France, and asked them to prosecute her and me to double our sentences, to 26 years in my case, so as to keep GcMAF hidden for another 25 years.

It is illegal to prosecute someone twice for the same offence in Europe under both the Lisbon Treaty and the ECHR, the European Convention of Human Rights. But the law does not trouble either the judges or the Crown Prosecution Service (CPS). They have their own agenda, dictated to them by senior freemasonry, and they convict according to their agenda. The merits of the case do not count.

OCLAESP contacted the most corrupt Judge I have seen, Judge Jean-Luc Gadaud, who dreamed up nine charges out of his own imagination for me, then copied them to Lyn, even copying my case number. Neither Lyn nor I did anything with GcMAF in France, but that doesn't worry lawyers or judges.

Gadaud declared a conspiracy between two tiny GcMAF companies in France, Duurzaam BV and Cytoinnovations, who had never heard of each other, which allowed him to use the terrorism provisions of the European Arrest Warrant, EAW, and went to arrest Lyn and myself with 13 police, four with machine guns. But we were rarely in France, and weren't there. He got the innocent David Halsall, and put him in prison without charges, from whence he emerged 5 months later half-dead.

Three corrupt English judges, Rebecca Crane, Sir Michael Supperstone in the High Court on the Strand, and Michael Snow in the Supreme Court, all said Lyn should be extradited to France, even though they knew she was innocent of all charges in both Britain and France.

Our courts in France, the U.S. and UK are all invalid Admiralty courts. The valid common law court of the people, with a jury of 12, has already convicted three of the judges, Supperstone, Nicholas Loraine-Smith and Gadaud, of Abuse of Power and Malfeasance in public office. Unfortunately, the State does not listen.

Lynda's now spent over two months in French prisons, the worst prisons in Europe; conditions are so appalling 1,000 attempt suicide every year. Please write to her: Lynda Thyer, #454951, MAF de Fleury-Mérogis Prison, 9 Avenue des Peupliers, 91705 Sainte-Geneviève-des-Bois, France

The CPS and the courts used to side with the man on the street against big corporations and governments. Not anymore. According to Benito Mussolini, a dictatorship is when the courts and the State combine with big corporations against the people. The UK is already the worst of Western dictatorships.

The website for GcMAF is www.gcmaf.se. The site mentions some 300 scientists, 350 doctors and clinics, and 150 scientific research papers supporting the safety and efficacy of GcMAF. Half of those research papers even made it on to the American National Library of Medicine, as they should have, given that GcMAF has at least 9,000 patient success stories behind it. As if that were not enough, GcMAF has over 100 videos and 400,000 followers on YouTube. We will get there.

If you live in the United States, you can go on www.thenhf.com, click on "Campaigns," and then "GcMAF Cures Cancer." Next, click on "Take Action" at the bottom, key in your zip code and address, and the site will send an automated letter (which you can edit) to your Senators and Congressman. If you haven't already, it really is long past time for you to take action.
